After having had much experience in growing Tomato plants for both wholesale and retail trade, we feel sure that we will be able to grow plants that will please the most exacting.

EARLY PLANTS

What does a few cents amount to when compared to the quality and quantity received? All Tomato plants at the following prices unless stated otherwise:

PRICES: Post-paid—12 for 15c; 25 for 25c; 50 for 45c; 100 for 75c; 250 for \$1.65; 500 for \$3.00; 1,000 for \$4.75.

If you want a larger amount, write for prices. When it comes to Tomato Plants, we are headquarters.

NEW STONE—A standard, main crop; red, medium early, a fine canner. Very popular.

Everything Post Paid

Acme—Beautiful deep rose; solid fine for market and family. A real main cropper.

Buckbee's 50-Day—Mr. Buckbee, the originator, claims that good plants will produce ripe fruit in 50 days after set in the ground. Hence the name "50-Day." If it is early tomatoes you want, try this one.

Our customers who have tried this one are very enthusiastic about it and will take no substitute. Our plants are grown from originators' seed only.

Arkansas Wilt-Resistant Tomato

This is a new tomato and owing to the scarcity and high price of seed we will be forced to sell as follows: 12 for 20; 24 for 35c; 100 for \$1.00.

The above tomatoes are endorsed by County Agents and they urge you to plant them, especially if you have been troubled with wilt. Read the following statement of County Agent of Pope County.

Tomato Plants

The Arkansas Wilt Resistant Tomato was developed at the U. of A., and we feel sure for gardens where you have wilt that this is the safest tomato to grow in this section. It is very much like the Stone and is almost entirely wilt resistant. Wilt affects many gardens of the County and causes the plants to die about the time they begin to bear.

M. SULLIVANT, County Agent.

Mansfield Tree or Mammoth Prize—The seed men claim this tomato to grow 10 to 15 feet in height; begins to ripen by July 4th and continues until frost; firm and almost seedless; fine flavor.

Beefsteak Tomato—Without question king of all tomatoes. The world's unbeatable tomato for main crop. Ripens early and continues to fruit for a long period. Large, splendid keeper; very productive; fine color; flavor cannot be beat. Our Beefsteak seed are obtained direct from the originator, making them genuine.

Ponderosa—Of perfect shape. Very large; extra prolific; early to late. Quality fine. Color pink. Too well known to need much description. A winner.

New Dwarf Ponderosa or Tree Tomato—A cross between Dwarf Champion and Ponderosa; plant grows about 2 feet.

"First of All"—The originators claim this to be the earliest, largest, smoothest, finest-flavored, extra early tomato in cultivation. Color rich cardinal red, tough skin, making a good shipper, fine for market or table. Don't fail to try it.

Again we get our seed direct from the originator. Our plants will be genuine.

Earliana—An extremely early, smooth, bright red tomato; good sizes and vines small but vigorous. Bears fruit in clusters.

This is the tomato that delivers THE GOODS.

Gulf State Market—A deep purplish pink variety of medium size and round form. It is unsurpassed as a shipping or market garden variety, maturing *very early* and bearing an enormous crop. A selection of Early Detroit, but larger and more productive. This is the tomato used by so many large gardeners and car load shippers. It should be pruned and staked.

John Baer—Early, smooth, bright, scarlet; has short, vigorous vines; has less seeds than Earliana and a little later.

Giant Everbearing—A beautiful red, wonderful yielder; ripe fruit from early summer until killed by frost; medium size; for a continuous crop this one is hard to beat. Try it and be convinced.

Condon's Peerless Tomato — Coreless nearly seedless, solid meat, bright red. You will be doing yourself an injustice not to try one. A main cropper.

Moore's Old Duke of York
CLAIMED BY THE ORIGINATORS TO
BE BLIGHT-PROOF.

This is a new one on me, but Mr. Moore, the originator, made such great

claims that we wanted to try it. A heavy cropper; ripens evenly to the stem, produces until killed by frost; quality the very best, solid and meaty. A fine shipper.

Bonny Best—Fruit generally borne in clusters. A good, uniform early tomato; scarlet red color.

King of the Earlies—A new tomato. This tomato is claimed to be the earliest, smoothest, early tomato in the world—a tomato above all others. The plant is a mass of beautiful red fruit. If you want early tomatoes don't miss this one.

Dwarf Champion or Tree Tomato—The most popular of the dwarf variety in cultivation. Sturdy stocky plants, are of upright growth, need no support. Produces handsome purplish red fruits that begin to ripen early and are produced throughout the season.

Perfection—A standard early red variety. As now grown it is very similar to Chalk's Jewel. The fruit ripens early and bears until frost.

Matchless—A very dependable, large, smooth, second early sort, makes a good canning variety; color, cardinal red.

Red Rock—One among the best. Its size, beauty, shape, color, flavor, durability and productiveness makes it desirable to growers.

Snowball—A novelty in tomatoes; color pearly white; firm and solid; early to late; fine for table, pickling, or canning.

Yellow Pear—Solid, fine flavor; small, pear shape; productive; fine for preserves.

Cabbage Plants

Early Jersey Wakefield—One of the most popular of the extra early varieties, not so large but fine quality; very solid; fine leaves, sure to head.

Charleston Wakefield—This is a very valuable sort; is only a few days later than the early Jersey but is much larger; is a standard, early variety in the South and proves to be one of the best known for clay and heavy soil; heads solid.

Flat Dutch—Large flat heads.
PRICES, postpaid: 100 for 35c; 200 for 65c; 500 for \$1.25; 1000 for \$2.25. Orders large or small thankfully received.

If you wait until May to transplant the chances are you will fail to get satisfactory results. 100 for 35c; 500 for 1.00; 1000 for \$1.85.

SWEET POTATOE PLANTS

READY FOR SHIPMENT APRIL 25th OR SOONER

We can supply any quantity from the small garden to the largest fields. Diversify your crop, cotton is too cheap, grow Sweet Potatoes.

Our seed are selected from the best potatoes obtainable in this vicinity and treated as the Government suggests, as follows:

Dip in a solution of Corrosive Sublimate for 10 minutes; potatoes in wooden baskets, solution in wooden barrels. First dissolve 4 oz Corrosive sublimate in warm water (not in tin container) then put the 4 oz in 32 gallons of water and dip 10 bushels, then fill barrel to its original depth with water and add 1 oz. more Sublimate. Each time you dip 10 bushels repeat this until you dip 50 bushels, then empty and start new. This solution is exceedingly poison and must be handled where children and animals will not get it. Be sure to wash hands well before eating as only a small amount of Corrosive Sublimate is death.

This is the way all potatoes bedded by us are treated.

We have been bedding several hundred bushels for a good many years and we claim to know a little about growing Sweet PotatOE Plants and in buying from us you get the benefit of all our experience. Our potatoes are bedded in soil each year that potatoes were never grown or bedded in before.

We pack well and guarantee plants to arrive in good condition.

We began shipping plants about April 18th last year.
